

Dear Parents,

Today, your student set a goal for their daily timed tests.

In one minute, your child should aim to complete _____ problems.

We will begin tomorrow with Set 1: 2+1, 1+2, 3-1, 3-2

These are the only facts that will be on the test. If your child would like to make flashcards tonight to study, they may feel more confident on tomorrow's test.

Once they reach their goal, they will be able to move onto Set 2. Set 2's test will include problems from Set 1 as well. This is very individualized and every student will be working at his or her own pace. The only ones they are competing against are themselves! They should be aiming to improve each day. Practice at home will help them achieve their goal more quickly.

Below are the problems that will be added on as they move to higher sets. Please keep this for reference so that students can make flashcards and prepare for their next tests.

Thanks,

Lisa Stuart
