Fifth Disease Alert

Your child may have been exposed to Fifth Disease.

What to look for:

- ✓ Flushed cheeks & mild rash develops, first on the arms and legs.
- ✓ Rash eventually spreads to all parts of the body, even fingers and toes.
- ✓ Symptoms appear 4-20 days after exposure.
- ✓ Rash can reappear up to 3 months, if exposed to temperature changes such as heat, sun or hot bath water.
- ✓ Pregnant women should seek the advice of their doctor if exposed directly.
